## Create Forms And Documents With A Comprehensive Design Tool.

Adobe LiveCycle Designer software helps you easily author form and document templates that combine high-fidelity dynamic presentation with sophisticated XML data handling. LiveCycle Designer lets you create form templates that can output to paper, PDF, and HTML5 without having to write scripts.

Advanced layout capabilities let you preserve the appearance of imported PDF documents, while spell-check and customizable user dictionaries reduce the chance of errors.

**The course runs from 9.30 am to approximately 4.30 pm.  
Duration 1 day**

The course will include but not limited to:

How PDF Forms work  
What makes Adobe LiveCycle Designer unique
